## **NH STATEWIDE AERIAL IMAGERY NEEDS ASSESSMENT**

The NH GIS Technical Advisory Committee Task Force is developing a long-term plan for regular acquisition of statewide aerial imagery that will meet the needs of GIS data users throughout New Hampshire. If you make use of GIS data and aerial photography in New Hampshire, you are invited to participate in an important conversation about the future of statewide imagery collection!

We are seeking input from GIS data users concerning their current and expected future use of statewide aerial imagery and desired technical specifications for the applications they support. You are encouraged to represent the needs of your organization, town, or agency by completing an online aerial imagery needs assessment survey.

To access the survey, visit

**[www.granit.unh.edu/ImageryNeedsAssessmentSurvey2018.pdf](http://www.granit.unh.edu/ImageryNeedsAssessmentSurvey2018.pdf)**

The survey will be open through August 31, 2018

In addition to the survey, we will be hosting input sessions around the state – providing participants with an opportunity to offer further input for the needs assessment as well as to learn about how aerial imagery is currently being used in New Hampshire and how to access current statewide aerial imagery and GIS data. Sessions will be held at the following locations:

- Plymouth, NH – 10:30 AM, July 24, 2018, Pease Public Library, 1 Russell St., Community Room
- Nashua, NH – 6:30 PM, July 31, 2018, Nashua Public Library, 2 Court St., NPL Theater
- Concord, NH – 10:30 AM, August 1, 2018, 29 Hazen Drive, NH Department of Environmental Services Auditorium
- Portsmouth, NH – 6:30 PM, August 23, 2018, Portsmouth Public Library, 175 Parrott Avenue, Levenson Community Meeting Room

Registration is not required, but we encourage you to RSVP using the survey link above.

We look forward to hearing from you, as our success depends on the participation of a wide range of professionals, organizations, and agencies! For questions or further information, please contact
